

## Don't take a Chance on Patient Safety

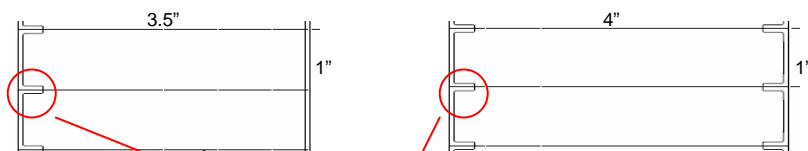

Putting the right label on an IV bag or blood bag is critical to ensure patient safety. Not only are our labels optimized to provide the highest quality bar codes, but Zebra carefully selects and tests our IV bag and blood bag label materials to meet the print durability and adhesive safety standards required in the healthcare industry. Utilizing FDA 175.105-compliant adhesives, our IV bag and primary blood bag labels are safe to apply directly onto bags. Our secondary blood bag labels are designed to be applied onto existing blood bag labels. The bottom line: Zebra printers and labels are the safest choice for your IV bag and blood bag labeling requirements.

# Zebra® IV Bag and Blood Bag Label Solutions
